

Felicitously facilitates optimal food inventory management.

*A spike in **energy prices** coupled with skyrocketing **consumer inflation** has accelerated the **cost-of-living crisis**.*

*We tackle **food waste** on four distinct levels.*

Optimise the food
inventory management 

Provide recipe ideas 

 Incentivise volunteering
and donations

 Build a macro marketplace

**An exemplary Felixitously
user journey
walks you through our app.**

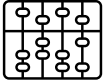

Our technical landscape encompasses various technologies.

Develop mobile app (iOS or Android) using **Flutter framework**.

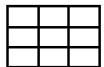

Leverage existing Cloud provider services (**AWS** or **GCP**) for deployment.

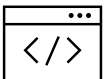

Suggest recipe via **content-based recommender system** (Python v3.8.0).

Build backend **APIs** (Python v3.8).

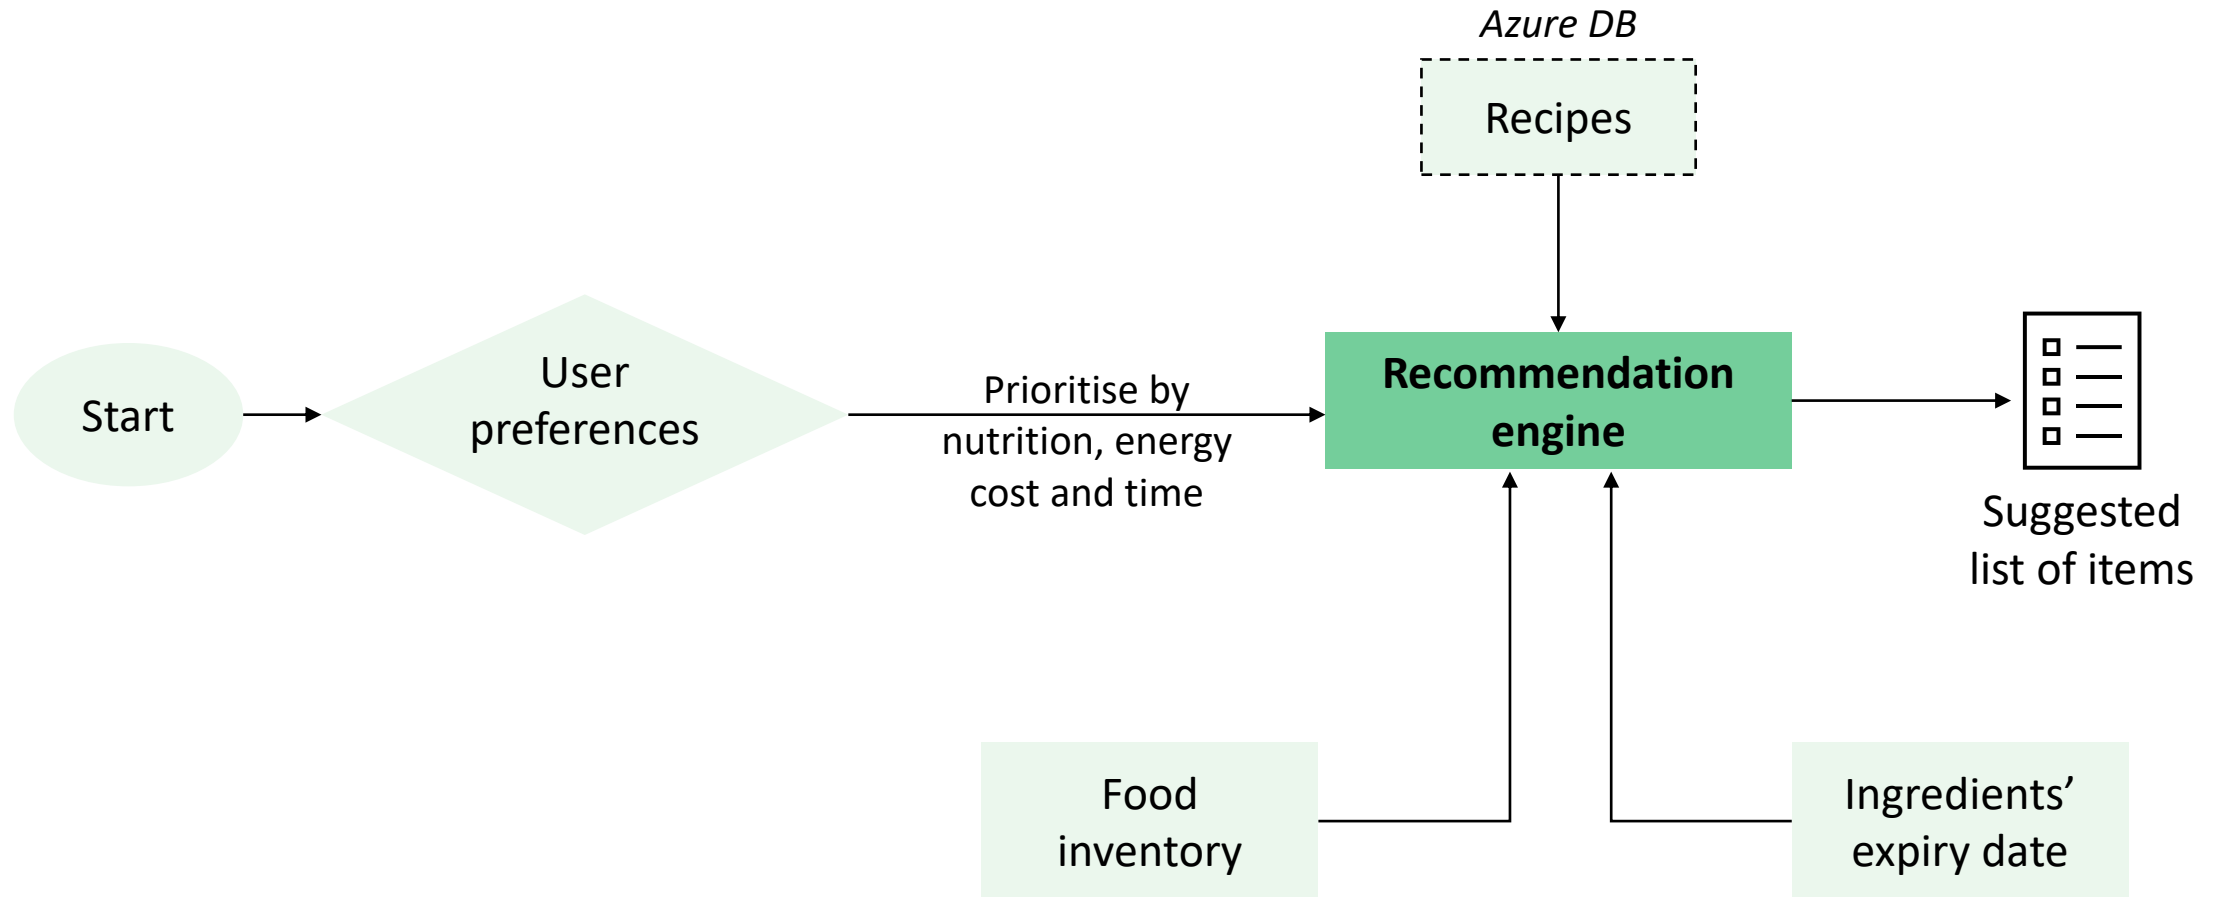

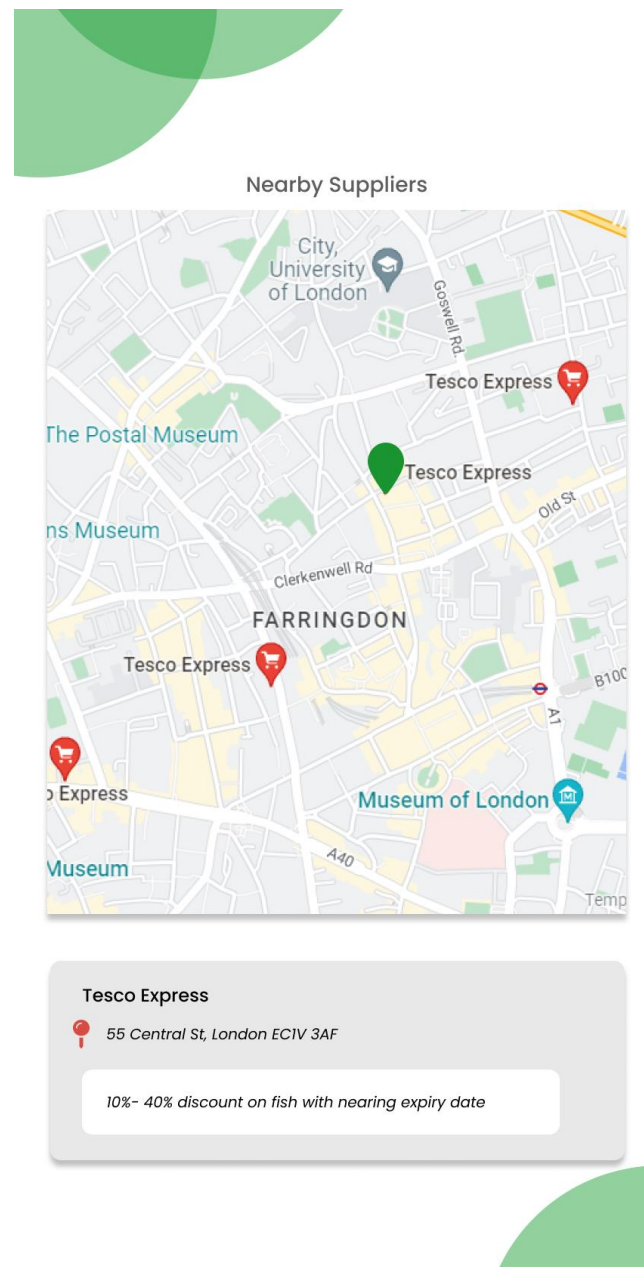

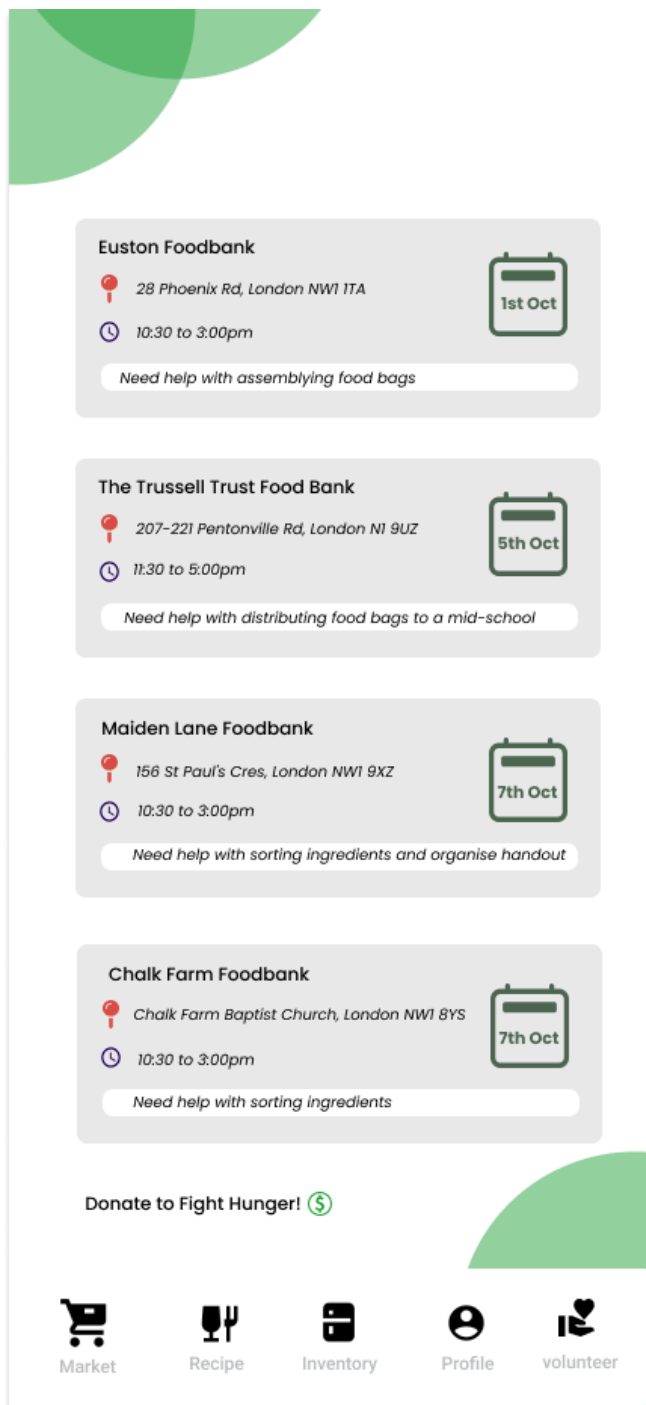

Aggregate third-party **data** from NGOs, food suppliers, and other non-profitable players.

Optimise bills using **NLP** (info on utensils and kitchen appliances) to determine **kw utilisation per recipe**.

The Felixitously ML algorithm targets food waste at its core.

Our **X-factor** comprises the provision of both a **communal market place** as well as a **volunteering and donation feature.**
